DevOps : Azure DevOps, CI/CD, Helm, Elasticsearch, Rancher, DataDog

Tools : Git, GitHub, JetBrains IDE, VS Code, Vim

Languages : French (Native), English (B2*, 920/990 on TOEIC)

Hobbies : Running - Movies and TV Shows - Manga

PROJECTS

Zeno | github.com/toudonou/zeno

December 2025

- Chess bot developed in Rust
- Algorithms: Implementation of *Alpha-Beta* search and move ordering with *Move Ordering*
- Technique: Use of *Bitboards* for board representation and transposition tables for caching positions

URL Shortener | github.com/toudonou/url-shortener

June 2025

- Web application for URL shortening and link redirection.
- Logic: Implementation of a *Base62* encoding algorithm to generate unique and short keys
- Stack: C# (.NET) for backend, HTML/CSS for user interface

Huffman Encoding CLI Tool | github.com/toudonou/huffman-encoding-cli

February 2025

- Text file compression tool based on entropy encoding
- Data Structure: Creation of intermediate representation with a *Binary Tree*
- Technique: Binary encoding and decoding by character frequency, enabling significant file size reduction
